Special Issue

Mutagenesis Studies in Latin America

edited by Patricia Ostrosky and Michael D. Shelby

Preface

P. Ostrosky and M.D. Shelby (Mexico, U.S.A.)	1
Effect of ethanol pretreatment on genetic damage induced by X-rays in <i>Drosophila melanogaster</i> sperm	
E.R. Muñoz (Argentina)	3
The induction of reciprocal translocations in mouse germ cells by chemicals and ionizing radiations. II. Combined effects of mitomycin C or thio-tepa with two doses of γ -rays	
J.C. De Luca, F.N. Dulout, M.A. Ulrich, C.C. Furnus and J.M. Andrieu (Argentina)	11
The induction of reciprocal translocations in mouse germ cells by chemicals and ionizing radiations. III. Differential effect of two doses of adriamycin combined with 5 or 9 Gy of γ -rays	
J.C. De Luca, F.N. Dulout, C. Grillo, N.C. Terreros and J.M. Andrieu (Argentina)	17
Aneuploidies, chromosome aberrations and dominant gene mutations detected in 113 913 consecutive newborn children in Mexico	
A. Hernández, M.C. Reynoso, F. Soto, D. Quiñones, Z. Nazará, A. Rolón, M.E. Jiménez and R. Elancarte (Mexico)	23
Genotoxic effect of a keto-aldehyde produced by thermal degradation of reducing sugars	
J.O. Valsa, I. Felzenszwalb, A. Caldeira de Araujo and R. Alcantara-Gomes (Brazil)	31
Genotoxic, mutagenic and recombinogenic effects of rauwolfia alkaloids	
G. von Poser, H.H.R. Andrade, K.V.C.L. da Silva, A.T. Henriques and J.A.P. Henriques (Brazil)	37
Genotoxicity of the pesticide propoxur and its nitroso derivative, NO-propoxur, on human lymphocytes in vitro	
M.G. Cid, D. Loria and E. Matos (Argentina)	45
6-Thioguanine-resistant T-lymphocyte autoradiographic assay. Determination of variation frequencies in individuals suspected of radiation exposure	
P. Ostrosky-Wegman, R. Montero, A. Palao, C. Cortinas de Nava, F. Hurtado and R.J. Albertini (Mexico, U.S.A.)	49
The kinetics of DNA damage by bleomycin in mammalian cells	
D. López-Larrazá, J.C. De Luca and N.O. Bianchi (Argentina)	57
Erythrocytes modulate the baseline frequency of sister-chromatid exchanges and the kinetics of lymphocyte division in culture	
M.L. Larramendy, M.A. Reigosa and M.S. Bianchi (Argentina)	63
Length of cell cycle in vitro and sister-chromatid exchange (SCE) frequency in bone marrow cells from severely malnourished rats	
R. Ortiz and M. Betancourt (Mexico)	71
Fate of DNA lesions that elicit sister-chromatid exchanges	
P. Morales-Ramírez, R. Rodríguez-Reyes and T. Vallarino-Kelly (Mexico)	77
Assessment by Southern blot analysis of UV-induced damage and repair in human immunoglobulin genes	
M.S. Bianchi, N.O. Bianchi and A. de la Chapelle (Argentina, Finland)	89
Studies on Tn10 transposition and excision in DNA-repair mutants of <i>Salmonella typhimurium</i>	
C. Lorenzo, E. Howard and R. Nagel (Argentina)	99
[end of special issue]	
Announcement	105
Research Papers	
Persistence of drug-induced chromosome aberrations in peripheral blood lymphocytes of the rat	
F. Rosselli, L. Zaccaro, M. Venturi and A.M. Rossi (Italy)	107
X-Ray-induced specific-locus mutations in the <i>ad-3</i> region of two-component heterokaryons of <i>Neurospora crassa</i> . VII. Genetic lesions resulting in gene/point mutations at the <i>ad-3B</i> locus have different dose-response relationships	
F.J. de Serres (U.S.A.)	115
DNA polymerase alpha from HeLa cells synthesizes DNA with high fidelity in a reconstituted replication system	
M.P. Carty, Y. Ishimi, A.S. Levine and K. Dixon (U.S.A.)	141
The DNA cleavage induced by a chromium(V) complex and by chromate and glutathione is mediated by activated oxygen species	
A. Kortenkamp, G. Oetken and D. Beyersmann (F.R.G.)	155

Localization of deletion breakpoints in radiation-induced mutants of the <i>hprt</i> gene in hamster cells J. Thacker, E.W. Fleck, T. Morris, B.J.F. Rossiter and T.L. Morgan (Great Britain, U.S.A.)	163
Molecular characterization of X-ray-induced mutations at the HPRT locus in plateau-phase Chinese hamster ovary cells T.L. Morgan, E.W. Fleck, K.A. Poston, B.A. Denovan, C.N. Newman, B.J.F. Rossiter and J.H. Miller (U.S.A.)	171
Induction of selective DNA amplification and morphological cell transformation in Syrian hamster embryo cells P. Klein, B.L. Pool-Zobel, Ö. Yalkinoglu and J.R. Schlehofer (F.R.G.)	183
Studies on the effect of ascorbic acid and selenium on the genotoxicity of nitrofurans: nitrofurazone and furazolidone J. Gajewska, M. Szczypka, B. Tudek and T. Szymczyk (Poland)	191
Several known indole compounds are not important precursors of direct mutagenic <i>N</i> -nitroso compounds in green cabbage H.G.M. Tiedink, A.M. Hissink, S.M. Lodema, L.W. van Broekhoven and W.M.F. Jongen (The Netherlands)	199
Induction of dominant lethal mutations by combined X-ray-acrylamide treatment in male mice M. Dobrzyńska, M. Lenarczyk and A.K. Gajewski (Poland)	209
A 5-fold reduction in sister-chromatid exchange following implantation of mouse embryos is not directly related to the expression of embryonic genes responsible for oxygen radical metabolism S. El-Hage and S.M. Singh (Canada)	217
Chromosome aberrations, sister-chromatid exchanges and cell-cycle kinetics in human peripheral blood lymphocytes exposed to organoselenium in vitro A.M. Khalil and A.O. Maslat (Jordan)	227
Structure-activity relationships for the mutagenic activity of tricyclic intercalating agents in <i>Salmonella typhimurium</i> W.A. Denny, P.M. Turner, G.J. Atwell, G.W. Rewcastle and L.R. Ferguson (New Zealand)	233
Metabolic activation of quercetin mutagenicity R. Vrijsen, Y. Michotte and A. Boeyé (Belgium)	243
Use of a composite polyfunctional model electrophile as a probe to analyze the performance of an artificial intelligence structure-activity method H.S. Rosenkranz and G. Klopman (U.S.A.)	249
Chromosome-type exchange aberrations are induced by inhibiting repair of UVC-induced DNA lesions in quiescent human lymphocytes M. Holmberg and E. Gumauskas (Sweden)	261
On the time course of the interactions between DNA breaks in the production of a radiation-induced chromosome exchange aberration M. Holmberg (Sweden)	267
Dose-effect relationship for X-ray-induced reciprocal translocations in mouse spermatogonia following pretreatment with 3-aminobenzamide P.P.W. Van Buul, A. Léonard and J.H. Goudzwaard (The Netherlands, Belgium)	273
The nature of ultraviolet light-induced mutations at the heterozygous <i>aprt</i> locus in Chinese hamster ovary cells E.A. Drobetsky and B.W. Glickman (Canada)	281
The load of genetic and partially genetic diseases in man. III. Mental retardation A. Czeizel, K. Sankaranarayanan and M. Szondy (Hungary, The Netherlands)	291
Modulation of the control of mutagenic metabolites derived from cyclophosphamide and ifosfamide by stimulation of protein kinase A B. Oesch-Bartlomowicz, S. Vogel, H.-J. Arens and F. Oesch (F.R.G.)	305
Analysis of interactions between mutagens, I. Heat and ultraviolet light in <i>Saccharomyces cerevisiae</i> D.D. Ager and R.H. Haynes (Canada)	313
Analysis of interactions between mutagens, II. Ethyl methanesulfonate and ultraviolet light in <i>Saccharomyces cerevisiae</i> D.D. Ager and R.H. Haynes (Canada)	327
The mutagenic effects of diacridines and diquinolines in microbial systems L.R. Ferguson, P.M. Turner and W.A. Denny (New Zealand)	337
Contents, Vol. 232 (1990)	345
Announcement	346

Announcement

11th International Chromosome Conference

4-8 August 1992, Edinburgh (Great Britain)

Anyone wishing to be put on the mailing list to receive the First Announcement giving preliminary information about this meeting should send their names to Dr. Ann Chandley, MRC Human Genetics Unit, Western General Hospital, EH4 2XU (Scotland).
